

Divine Child
*School Activities/
Athletic Addition
Dearborn, Michigan*

A 10,000 s.f. building addition creating a multi-purpose “activities/athletic” facility for the parish high school. The addition includes a gymnasium with an interior exercise track, conditioning facilities, administrative offices and an atrium concourse area.

The architectural elements of the existing auditorium building were retained to create focal points in the new concourse atrium. A second story addition was created over an existing classroom wing to facilitate athletic training rooms.

The new concourse areas provide display and exhibit areas for student achievements and afford congregating areas for students and visitors utilizing the existing auditorium or the new multi-purpose facility.
