

Gene Butman Ford
Ypsilanti, Michigan

This dealership was renovated/expanded from a small and uninviting space to a busy, warm and exciting showroom.

The curve of the building exterior and the sweeping curve of the ceiling lines and flooring accents reflects the styling of the automobile. An exposed ceiling, hidden track lighting, and rich cherry veneers were used to add warmth.

Friendly Ford
Monroe, Michigan

This new 47,000 s.f. Ford Dealership provides a simple backdrop to showcase new vehicles. Lightly colored materials, glass block, and a white polished floor, create sparkle and class.

The exterior of this dealership is very impressive with the use of white scored block, and blue glass. Vehicle accents of orange, red, yellow, and blue provide the contrast needed to draw-in customers.
